I Pulnix TM-300 CCD camera

PULNiX

The PULNIX TM-200/TM-300 cameras offer a high resolution interline transfer 1/2" CCD imager in a very tiny package. Designed to meet a variety of application requirements, this camera has many standard and optional features at a very affordable price. It is available in both EIA (TM-200) and CCIR (TM-300) formats. The most commonly needed adjustments-manual gain, gamma, AGC, and field/frame selection-are easily accessible on the rear camera panel. Electronic shuttering is another standard feature. Eight shutter

speeds, ranging from 1/60 sec. to 1/10,000 sec., can be selected externally using the rotary dial on the rear panel. The miniature size of the TM-200/TM-300 Series cameras eliminates the need for a remote imager camera in all but the most confined spaces. These cameras fit easily, both physically and functionally, into all types of machine vision, automated inspection, and related applications. Other uses include remotely piloted vehicles, miniature inspection devices, surveillance, microscopes and medical equipment.

►Ask us About the TM-200/TM300 ?

Specifications

TM-200 (EIA), TM-300 (CCIR)

Imager 1/2" Interline transfer CCD, HAD type Pixel 768 (H) x 494 (V), 752 (H) x 582 (V) Cell size $8.4 \mu m \times 9.8 \mu m$, $8.6 \mu m \times 8.3 \mu m$ **Scanning** 525 lines EIA, 625 lines CCIR

Internal/External auto switch, fH=15.734 KHz ±5%, fV=59.94 Hz±5% Sync

TV resolution 570 (H) x 350 (V), 560 (H) x 420 (V)

S/N ratio 50 db min. AGC off Min. illumination 0.5 lux (F=1.4)

Video output 1.0 Vp-p composite video, 75 ohm

AGC ON/OFF back panel switch 1 or 0.45 back panel switch

Gamma Lens mount C-mount

Power req. 190 mA. 11-15V Operating temp. -10° C to +50° C Vibration & shock Vibration 7G Shock 70G Size (W x H x L) 45.8mm x 39.4mm x 66.3mm

Weight 157g (5.6 oz.) Power cable 12P-02

Power supply K25-12V, DC-12N, PD-128, P-15-1 **Functional options** 3-1, 3-2, 7-2, 21, 25

II National Instruments PCI-1407 image acquisition card: single channel monochrome

NI 1407

- 1 video input for standard monochrome cameras (RS-170 or CCIR VGA)
- Synchronization for multiple camera acquisition
- Partial image acquisition Onboard programmable ROI - Onboard pixel
- Programmable gain and offset
- Pixel jitter less than 2 ns
- ▶ 256-byte LUT
- 1 external trigger/digital I/O line
- Scatter-gather DMA controller

Driver Software

 NI-IMAO for Windows2000/NT/Me/9x

Application Software

- •NI LabVIEW
- NI Measurement Studio NI LabWindows/CVI - Visual Basic Visual C++
- NI Vision Development Module maximize the use of the available PCI. IMAQ Vision - IMAQ Vision Builder

Hardware PCI Interface

The PCI bus is the electrical interface for both the PCI-1407 and the PXI-1407. The PCI interface, implemented with a National Instruments MITE ASIC, can transfer data at a maximum rate of 132 Mbytes/s in master mode to

562 National Instruments • Tel: (800) 433-3488 • Fax: (512) 683-9300 • <u>info@ni.com</u> • <u>ni.com</u>

The NI 1407 Series is ideal for machine vision and scientific imaging end users and OEM developers who are looking to reduce costs. The NI 1407 Series co ts of image acquisition plug-in devices with a single high-accuracy monochrome video input, external triggering to-use image acquisition driver software. The NI 1407 Series advanced features include partial image scanning, programmable gain and offset, and onboard decimation and LUT processing.

For easy configuration of both RS-170 and CCIR monochrome cameras, the NI 1407 Series includes NI-IMAQ image acquisition driver software and the National Instruments Measurement & Automation Explorer configuration utility. With NI-IMAQ, you can quickly and easily start your application without having to program at the register level.

Quick and Easy Camera Configuration

Easily configure standard video capture with the Measurement & Automation Explorer delivered with NI-IMAQ. This utility is an interactive configuration tool for setting the camera type (RS-170 or CCIR VGA), programmable ROI, decimation, gain, and offset.

Applications

The low-cost, high-accuracy NI 1407 Series is ideal for both industrial and scientific environments. The NI 1407 Series is a highperformance, versatile solution for a wide range of vision applications, such as assembly-line product inspection and biological cell growth monitoring. An NI 1407 Series board can generate 8, 16, and 32-bit memory read and write cycles (both single and multiple). The interface logic ensures that the NI 1407 meets the loading, driving, and timing requirements of the PCI specification.

Scatter-Gather DMA Controller

With the NI 1407 Series, there is no need to lock down large, continuous blocks of memory. NI 1407 devices have an onboard DMA controller capable of transferring data from the PCI bus to the onboard FIFO buffer. The controller performs scatter-gather DMA, which means the DMA controller can reconfigure on the fly and perform continuous image transfers to either contiguous or fragmented buffers.

3250AE0033 Issue 1.2: SALT HRS Electronics Specifications

Genlock and Synchronization Circuitry

The genlock and synchronization circuitry receives the incoming video signal and generates PCLK, HSYNC, and VSYNC signals for use by the acquisition and control circuitry. Use the genlock feature to synchronize multiple cameras and multiple 1407 devices for simultaneous image acquisition.

8-Bit A/D and LUT

An 8-bit flash A/D converter performs the image digitization. The result of the digitized image passes to a 256 by 8 RAM LUT. You can configure the LUT to implement simple imaging operations, such as gamma correction, contrast enhancement, data inversion, or any nonlinear transfer function. An NI 1407 has programmable gain and offset circuitry for optimizing the input signal range.

Specification Typical for 25 °C unless otherwise noted. Available Formats	
RS-170/NTSC CCIR-601/PAL VGA Video Input	25 frames/s interlaced
Quantity Video 0 Input impedance Input impedance Bandwidth Input full-scale range A/D Conversion	Single-ended (BNC) 75 ~ 75 ~ , 1 M~ (jumper selectable) Typical 20 MHz (-3dB)
Gray levels	±1 LSB maximum < 0.5 LSB rms Typical 48 dB
Trigger sense Trigger polarity CSYNCIN sense CSYNCIN level Minimum detectable pulse width VIH(TTL) VIL(TTL)	Programmable (rising or falling) Selectable (TTL) Programmable (rising or falling) 20 ns 2V

I/O Connector

The three BNC connectors provide connections to the video source, the external digital I/O line/trigger, and CSYNC external lines.

III Hamamatsu & Spellman

HAMAMATSU

PHOTOMULTIPLIER TUBE **R943-02**

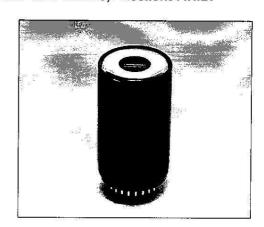

GaAs (Cs) Photocathode, Wide Spectral Response, 51 mm (2") Diameter Head-on Type for Photon Counting, Low Dark Counts, Excellent P.H.D.

FEATURES

- Wide Spectral Response 160 nm to 930 nm
- High Quantum Efficiency In Near IR ... 14 % at 632.8 nm
- Fast Rise Time 3.0 ns at 1500 V
- Excellent Single Photoelectron
 Pulse Height Distribution
 - Peak to Valley Ratio 2,3 (at -20 °C)
- Low Dark Counts 20 s-1 Typ. (at -20 °C)

APPLICATIONS

- Raman Spectroscopy
- Fluorescent Spectroscopy
- Astrophysical Measurement
- Laser Detection

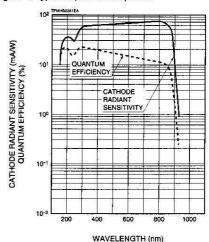

Hamamatsu R943-02 is a 51 mm (2") diameter head-on type photomultiplier tube having GaAs (Cs) photocathode and synthetic silica window. The combination of the GaAs photocathode and the synthetic silica window allows high sensitivity over a wide spectral range from UV to IR (160 nm to 930 nm).

The R943-02 is selected for photon counting and features low dark counts and excellent pulse height distribution (PHD) of single photoelectrons.

GENERAL

Parameter	Description / Value	Unit
Spectral Response	160 to 930	nm
Wavelength of Maximum Response	300 to 850	nm
Photocathode		
Material	GaAs(Cs)	-
Minimum Effective Area	10×10	mm
Mode	Opaque	_
Window Material	Synthetic silica glass	-
Dynode		
Secondary Emitting Surface	Cu-BeO	
Structure	Linear focused	-
Number of Stages	10	0_27
Direct Interelectrode Capacitances		30 3200
Anode to Last Dynode	Approx. 2.7	pF
Anode to All Other Electrodes	Approx. 5.0	рF
Base	21-pin glass base	
Suitable Socket	E678-21C (supplied)	
Sullable Socker	E678-21D (sold separately)	
Weight	93	g
Operating Ambient Temperature A	-30 to +50	°C
Storage Temperature	-80 to +50	°C

PHOTON COUNTING UNITS C3866, C6465

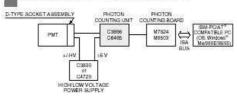

Photon counting units are designed to convert single photoelectron pulses from a photomultiplier tube into 5 V digital signals by use of the built-in amplifier and discriminator circuits. Photon counting with a high S/N ratio can be performed by simply connecting a counter to the output of the photon counting unit. The C3866 uses a high-speed electronic circuit that allows measurement with an excellent output linearity up to 107 s-1. The

C3866 also has a prescaler (division by 10) eliminating the need for a high-speed counter.

The C6465 provides an output linearity up to 10^s s⁻¹ and an output pulse width of 30 ns, making it suitable for use with a general-

HAMAMATSU

WIDE BANDWIDTH AMPLIFIER C6438

C6438 is a wide bandwidth, DC to 50 MHz, amplifier. While providing the photomultiplier tube output current directly to C6438 input connector, it provides the voltage output signal in the conversion coefficient of 10 mV/10 μA . It can be used as a wide bandwidth amplifier not only for a photomultiplier tube but also for other detectors, or simply as a wide bandwidth amplifier.

FEATURES

■Wide Bandwidth: DC to 50 MHz
■Rise Time: 7 ns Typ.
■Gain: 20 dB ± 3 dB (Approx. 10 Times)
■Non-Inverting Output
■Compact · Light weight

Thermoelectric Coolers

High Performance Thermoelectric Coolers C4877, C4878 Series

Left: C4877 Power Supply Right: C4877 Cooled PMT Housing

The C4877 series and C4878 series are thermoelectric coolers constructed with enhanced electrostatic and magnetic shielding (C4877 Series). This minimizes the influence of external noise on the photomultiplier tube and thus significantly improves photometric accuracy. These coolers offer user-triendly functions such as easy temperature control and pilot lamp blanking. The C4877 series is designed for use with 51 mm (2") or 38 mm (1-1/2") diameter head-on photomultiplier tubes, and the C4878 series for MCP-PMTs.

Features

- Thermoelectric cooling using Peltier elements
- About -30 °C cooling temperature (with +20 °C cooling water)
- · Evacuated, double-pane window with heater for frost prevention
- Built-in electrostatic and magnetic shielding (C4877 Series)
- Water shut-off protection to guard the Peltier elements
- Stable operation due to a regulated power supply

Specifications

[Cooled PMT Housing]

Parameter		Value/Description
Cooling		Thermoelectric cooling using Peltier elements
Heat Exchange Medium		Water
Amount of Cooling Water		1 L/min to 3 L/min
Cooling Temperature (with coolin	g water at +20 °C)	Approx30 °C
Temperature Controllable Range (with co	oling water at +20 °C)	-30 °C to 0 °C (continuously adjustable)
Cooling Time	27	Approx. 120 min
Optical Window Material	CATALON AND THE TAXABLE PARTY.	Evacuated double-pane fused silica window with heater
Applicable PMTs (Optional)	C4877 Series	28 mm (1-1/8") Dia. and 38 mm (1-1/2") Dia. and 51 mm (2") Dia. Head-on
	C4878 Series	MCP-PMT (R3809U-50 Series)

10W HIGH STABILITY SPELLMAN HIGH VOLTAGE ELECTRONICS CORPORATION POWER SUPPLY

PAGE 1 OF 2

- ARC AND SHORT-CIRCUIT PROTECTION
- LOW OUTPUT RIPPLE 0.001% P-P
- LOCAL AND REMOTE VOLTAGE PROGRAMMING
- 10V REFERENCE OUTPUT FOR EXTERNAL CONTROL
- HIGH STABILITY 0.001% LINE AND LOAD REGULATION
- MODELS UP TO 40KV OUTPUT
- CE MARK FOR EMC DIRECTIVE
- OEM CUSTOMIZATION AVAILABLE.

The MP Series has been designed as high performance do to do converters with output voltages up to 40kV.

Each module provides well regulated, low ripple and high stability high voltage in a highly versatile compact design, combining linear and switched mode techniques to minimize internal dissipation and generated EMI/RFI interference. The higher voltage modules are vacuum encapsulated to ensure corona free operation.

Specialist cell manufacture of the MP Series ensures prompt delivery.

IV Thorlabs Z625BV motorized actuator

V Empire Magnetics VC-U17-X

Empire Magnetics Inc.

Vacuum Stepper Motors Standard Grade - VS Frame Sizes

Stepper Motors

Ordinary motors cannot operate for long at pressures lower than 10^{-4} Torr. **Empire Magnetics** vacuum rated motors are constructed to allow extended operation at pressures as low as 10^{-7} Torr without a sacrifice in motor performance.

Some vacuum applications cannot tolerate contamination by motor outgassing products. To accommodate a range of motor cleanness requirements, **Empire Magnetics** provides three grades of vacuum rated stepping motors in the full range of environmental motor sizes.

Frame size selection:

Motors are typically made in groups or families, the families are identified by the outer diameter or size of the square, these references are called frame sizes. In the American system, a 23 frame is a nominal 2.3 inches in diameter. For motors less than one inch in diameter, the reference is typically known as a size. Herein is a list of the frame sizes offered by Empire Magnetics Inc. and some of the characteristics of the group that will allow you to select from them.

Frame Size 5: Nominal outer dimension of 0.5 inches, these motors are very low power, suitable only for instrumentation applications. Torque range of .25 to .5 oz-in. Cylindrical shaped motor.

3250AE0033 Issue 1.2: SALT HRS Electronics Specifications

<u>Frame Size 11</u>: Nominal outer dimension of 1.1 inches, these motors are very low power, suitable primarily for instrumentation applications. Torque range of .5 to 2.5 oz-in. Cylindrical shaped motor with square front flange.

<u>Frame Size 15</u>: Nominal outer dimension of 1.5 inches, these motors are low power, typically used for instrumentation applications. Torque range of 5 to 10 oz-in. Cylindrical shaped motor.

Frame Size 17: Nominal outer dimension of 1.7 inches, these motors are relatively low power useful for a wide range of industrial applications. Torque range of 13 to 26 oz-in. Cylindrical shaped motor laminations, with square end flanges front and rear. Since this motor does not have a housing, it is not available in all environments.

Frame Size 23: Nominal outer dimension of 2.3 inches. Extremely popular size useful for a wide range of industrial applications. Torque range of 60 to 150 oz-in. Cylindrical shaped motor with square front flange.

Frame Size 34: Nominal outer dimension of 3.4 inches. Power range of 80- 240 watts, useful for a wide range of applications. Torque range of 150 to 450 oz-in. Cylindrical shaped motor with square front flange.

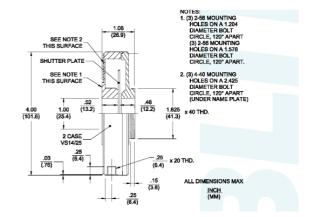

<u>Frame Size 42</u>: Nominal outer dimension of 4.2 inches. Power range of 240-700 watts, relatively high power in the stepper motor range. Torque range of 400 to 1600 oz-in. Cylindrical shaped motor with square front flange.

VI Fast shutters Uniblity VS25

The UNIBLITZ® VS14 and VS25 shutter series have been designed to give accurate, repeatable exposures for a wide variety of applications. They have been successfully field tested in microscopy, video imaging, PMT protection, and photographic applications worldwide.

Available with either 14mm or 25mm apertures, these shutters are offered in either cased or uncased configurations. The uncased shutter allows a high degree of flexibility when mounting the unit in situations inaccessible to most shutters due to spatial limitations. The cased version of this series is very popular due to the protection the black anodized

aluminum housing provides the precision shutter mechanism. To further enhance the adaptability of this series, we offer several customized mounts and mounting systems for popular microscopes and video imaging applications. For those applications where the shutter will be used to switch a mercury arc lamp, we strongly recommend the "R1" enhancement. This modification will allow the shutter to operate under the intense heat produced by mercury lamps. Additional information can be found in the specific data sheet entitled "MICROSCOPE & VIDEO MOUNTING SYSTEMS."

FEATURES

· Two aperture sizes available

14mm diameter - Model VS14

25mm diameter - Model VS25

- Laser energy ratings up to 10W/mm²
- Exposure repetition rates from DC 40Hz
- Solid state synchronization available
- · Cased and uncased versions available

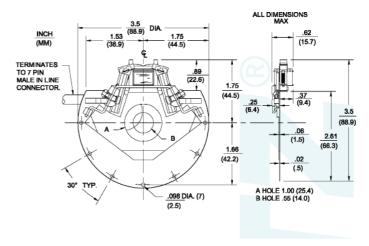

HOW TOORDER

VS14/VS25 Series Shutters Part Numbering System

For additional Timing and Operational information, see "Shutter Products-General Specification Sheet." See VS14/VS25 shutter outline drawings shown on page 2 of this specification sheet.

#2 UNCASED STYLE

(Figure 1) The VS14/25 uncased style is the basic configuration of this series and is best suited for OEM applications. Mounting can be accomplished through seven 2.5mm holes around the unit's outer perimeter. The unit terminates to a 7-pin male in-line connector through a six-inch cable assembly.

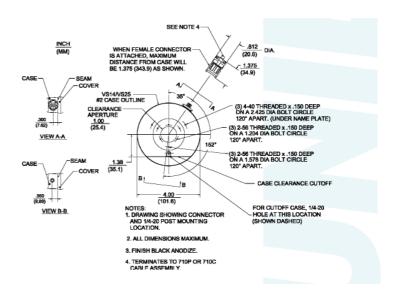

3250AE0033 Issue 1.2: SALT HRS Electronics Specifications

#2 CASED STYLE

(Figure 2) The VS14/25 #2 case style allows a number of mounting configurations. A 1/4-20 threaded hole is provided for post mounting. The 1.625in x 40TPI external thread, rear side, and the six 2-56 threaded holes, front side (Figure 3), can be interfaced directly into your application or fitted with variety of specific mounting options. See "MICROSCOPE & VIDEO MOUNTING SYSTEMS" data sheets for additional information. The unit terminates with a 7-pin male connector.

CASE/CONNECTOR LAYOUT

(Figure 3) This drawing illustrates 7-pin connector and 1/4-20 threaded hole layout for the VS14/25 series #2 case style.

VACUUM GAUGES

Diaphragm Vacuum Sensors

Diaphragm Vacuum Sensors are highly accurate, gas-species-independent gauges for critical process control and research applications. All sensors offered below have a 15-pin, D-type connector with a signal ouput of 0-10 VDC full scale.

Terranova® Model 808

Silicon Diaphragm Vacuum Sensor

The Terranova Model 808 Silicon Diaphragm Vacuum Sensor provides a low cost alternative for gas-species-independent pressure measurement in the range from 0.5 torr to 1000 torr.

- Small Size: (1.5"W x 2.2" L x 2.0"H)
- Gas-Species Independent Low Cost
- Compatible with CDG Controllers
- Vacuum Surfaces Inert

Part #: 808-1000-NPT Price: \$250.00

- Full-Scale Pressure: 1000 torr
- · Accuracy: Output Voltage: 0-10 VDC
- Vacuum Connection 1/8 NPT
- Electrical Connector: D-15 Male

(Also available with other vacuum connections. Inquire for price and delivery)

Dolan-Jenner DC-950 DC-Regulated Fiber Optic Illumir

[Specification Table | Related <u>Products</u> | <u>Helpful Literature</u> | <u>Product Matrix</u> | Technical Images]

- DC-Regulated Power Supply Less Than 0.5%
- Low Output Power Ripple Less Than 0.4%
- Remote Intensity Control from 0-5V DC Analog
- 200 to 10,000 Hours Lamp Life

The DC-950 is a DC-regulated upgrade to the PL-800. In addition, with 250VAC input, it is an upgrade to the PL-900 (no longer available). In add 100% intensity control and heat absorbing filter, the basic model features variation in the power output as compared to typical 2% variance in non-regulated illuminators. An optional iris and filter mount package (include and #55-219) allows control of the color temperature and the inclusion of diameter filter to the PL-900 illuminator setup. Built-in remote interface intensity control of output power via 0-5VDC analog input or an 8 bit Digital control accomplished via either the Digital-to-Analog Converter (RS-232 Control Package w/Software (#57-783). Stock Numbers #55-2: include standard Euro and UK plugs.

Specification Table

Variable Light Control	Solid State 0% to 100%
Lamp Type	150W EKE Quartz Halogen
Lamp Life	200 to 10,000 hrs.
Lamp Output	21V, 400,000 footcandles at fiber optic insertion plane
Color Temperature	3250K at maximum intensity
Input Voltage to Lamp	
Regulation	±0.5% or better
Output Ripple	0.4% or better
Remote Intensity Control	0-5V DC analog or optional 8-bit digital (via #55-232)
Construction	Aluminum
Operating Temperature	5°C to 40°C
Operating Humidity	0% to 80% non-condensing
Dimensions	7.25" W x 4.50" H x 9.50" L
Weight	11.5 lbs.
